PROTO[®]

Spin-Flex[®] Ratchets

New 1/4" and 3/8" Spin-Flex[®] ratchets provide an ergonomic way of ratcheting as well as a faster way to remove and replace nuts and bolts.

- Patented design features an adjustable handle that can be positioned and locked into one of four different angles to provide comfort as well as a unique handle position.
- Handle can be released so that it can rotate freely allowing the user to "speed" fasteners on and off rather than ratchet the traditional way.

Features & Benefits

- 4-way adjustable handle grip provides maximum comfort for the user — this allows you to lock the handle to be locked in the most comfortable position for you.
- Reduced head dimensions allows access to confined areas where head height and width are critical.
- High quality alloy ratchet gear provides exceptional torque and cycle life.
- Comfort grip handle prevents fatigue during use.
